

# Watertown's Stormwater Advisory Committee

[WatertownStormwater.org](http://WatertownStormwater.org)

## What is the Stormwater Advisory Committee?

An appointed committee of residents and town employees, created in 2009. The SAC supports Watertown's efforts to

- improve stormwater management,
- protect our rivers, ponds, and streams,
- and comply with stormwater permit responsibilities.

## Major activities

### 1. Develop new ordinances to improve stormwater management

The ordinance prohibiting "Illicit Discharges" to Watertown's storm drains was adopted by the Town Council May 11, 2011.

Draft ordinances governing stormwater management at construction sites (Erosion & Sedimentation Control/Grading Ordinance) and at newly developed or redeveloped properties (Ordinance for the Control of Post-Construction Stormwater Runoff) are under review by the Town Council.

### 2. Educate the community about stormwater problems and solutions

We're planning public education events and resources for residents, students, and businesses. Everyone in Watertown needs to learn more about this important environmental challenge!

### 3. Identify and advocate for stormwater funding through grants and other sources.

#### You're Invited

The SAC meets monthly, usually the 3<sup>rd</sup> Thursday, 4-6 pm, 124 Orchard St. (the DPW). Meetings are open to the public. Agendas and Minutes are available at [WatertownDPW.org](http://WatertownDPW.org).

#### Current Members
